

Carex barbarae

Santa Barbara Sedge

Type: Sedge

Size: 1-3'H x 2-3+'W

Exposure: Sun/Partial Sun

Flower Color: Brown

Bloom Time: Spring/Summer

- Typically found in riparian areas from Ventura County in Southern California up through Southern Oregon
- Californian Native Americans use white roots as a material for basket making
- Seeds provide a source of food for local wildlife
- Excellent choice for riparian restoration, stream bank control, and erosion control
- Leaf blades are light to medium green with a triangular shape
- Spreading, upright habit
- Spreads by rhizomes
- Evergreen
- Will tolerate soil disturbances such as flooding
