

**El Nativo Growers, Inc.**  
*Growers of Quality Plants for the California Landscape*

## **Taxonomic Name Changes of California Natives**

Often times when California natives are reclassified and renamed it can take several years before the new taxonomic names are adopted by the majority of those working in the horticulture industry. There are many times when new ‘consolidated’ names are not adopted at all due to the wide array of significant morphological and horticultural differences in the consolidated groups (eg. *Mimulus aurantiacus*, *Epilobium canum*). While El Nativo Growers, Inc., realizes the importance of using the currently recognized nomenclature; we also recognize that the majority of those we service must be able to easily recognize plants by the most commonly used and horticulturally significant taxonomic names. In order to accomplish this, we lists plants according to their most widely used taxonomic name in the nursery and landscape industries even if it is not a reflection of the most current scientific nomenclature. When necessary we will list plants under both their new and old names. The on-line Index to California Plant Names by the Jepson Flora Project, The Jepson Manual, and A California Flora and Supplement by Philip A. Munz were used as references for the following taxonomic information. Many of the reclassifications in the first edition of the Jepson Manual have been further investigated and may be reclassified again in the next edition of the Manual. Please use the chart below as a reference for taxonomic name changes and names currently used by El Nativo Growers, Inc.

<b>Previous Taxonomic Name</b>	<b>New Taxonomic Name(s)</b>	<b>Name(s) Used by El Nativo</b>
<i>Baccharis glutinosa</i>	<i>Baccharis salicifolia</i>	<i>Baccharis salicifolia</i>
<i>Baccharis pilularis</i> var. <i>consanguinea</i>	<i>Baccharis pilularis</i>	Listed under both names
<i>Elymus condensatus</i>	<i>Leymus condensatus</i>	<i>Leymus condensatus</i>
<i>Elymus glaucus</i>	<i>Elymus glaucus</i>	<i>Elymus glaucus</i>
<i>Elymus triticoides</i>	<i>Leymus triticoides</i>	<i>Leymus triticoides</i>
<i>Haplopappus venetus</i>	<i>Isocoma menziesii</i>	<i>Isocoma menziesii</i>
<i>Cleome isomeris</i>	<i>Isomeris arborea</i>	<i>Isomeris arborea</i>
<i>Mahonia aquifolium</i>	<i>Berberis aquifolium</i>	Listed under both names
<i>Mahonia nevinii</i>	<i>Berberis nevinii</i>	Listed under both names
<i>Mahonia repens</i>	<i>Berberis aquifolium</i> var. <i>repens</i> (synonym: <i>Berberis repens</i> )	Listed under <i>M. repens</i> and <i>B. repens</i>

<b>Previous Taxonomic Name</b>	<b>New Taxonomic Name(s)</b>	<b>Name(s) Used by El Nativo</b>
Mimulus aurantiacus	Mimulus aurantiacus (synonym: Diplacus aurantiacus)	Mimulus aurantiacus
Mimulus bifidus	Mimulus aurantiacus (synonym: Diplacus aurantiacus)	Mimulus bifidus
Mimulus longiflorus	Mimulus aurantiacus (synonym: Diplacus longiflorus)	Mimulus longiflorus
Mimulus longiflorus rutilus	Mimulus aurantiacus (synonym: Diplacus rutilus)	Mimulus longiflorus rutilus
Mimulus puniceus	Mimulus aurantiacus (synonym: Diplacus puniceus)	Mimulus puniceus
Rhus laurina	Malosma laurina	Malosma laurina
Salix hindsiana	Salix exigua var. hindsiana	Salix exigua
Salix lasiandra	Salix lasiandra var. lasiandra (synonym: Salix lucida ssp. lasiandra)	Salix lucida ssp. lasiandra
Stipa cernua	Nassella cernua	Nassella cernua
Stipa coronata	Achnatherum coronatum	Listed under both names
Stipa lepida	Nassella lepida	Nassella lepida
Stipa pulchra	Nassella pulchra	Nassella pulchra
Zauschneria californica	Epilobium canum ssp. canum	Zauschneria californica
Zauschneria californica ssp. latifolia	Epilobium canum ssp. latifolium	Zauschneria californica ssp. latifolia
Zauschneria cana	Epilobium canum ssp. canum	Zauschneria cana
Zauschneria septentrionalis	Epilobium septentrionale	Zauschneria septentrionalis
